

Call urging action on Motor License Fund Diversions

- Hi, my name is _____, I live in _____, and I am a constituent of _____.
- I'm calling because there has been recent, significant media attention around the proper use of transportation funds following an audit by the auditor general.
- As a member of the transportation industry, this has been a concern of ours for years and it will only continue to worsen. Because of this I am asking that:
 - the gas tax be used as it was intended and constitutionally restricted – for the maintenance and safety of public highways and bridges.
 - I'm asking for an accelerated reduction in the amount of money going from the highway fund to the State Police and for it to be lowered to \$700 million for FY 2019-20.
 - And on the topic of bills our fuel taxes shouldn't be paying, the cost of implementing REAL ID – about \$150 million – is a Homeland Security matter and unrelated to roads and bridges. I'm asking for this to also be completed funded from the General Fund instead of the Motor License Fund.
