

## Call in support of HB 1392: Electric Vehicle Road Fee

- Hi, my name is \_\_\_\_\_, I live in \_\_\_\_\_, and I am a constituent of \_\_\_\_\_.
- I'm calling to ask that you support House Bill 1392.
- Electric car users that charge their vehicles at home do not pay taxes that maintain our roads and bridges, and as more people buy electric cars, less and less funds will be available to address our deteriorating infrastructure.
- Many other states have implemented a modest registration fee on electric vehicles to account for this loss and I'd like to see this done in Pennsylvania.
- The average yearly amount paid in Liquid Fuels Tax per vehicle is \$276 and the proposed fee of \$150 per year for non-commercial vehicle is in line with other Electric Vehicle fees across the country.
- It's time that electric vehicles pay their fair share to maintain our roads and bridges.
